

CopyWriter 452 Pro Rackmount

The CWR Pro 452 RM is a professional, high-speed CD recordable duplicator engineered for the rackmount environment. Microboards Technology has applied their expertise in tower CD duplication to develop this sleek, black rackmount system to meet the demands of the Pro Audio user and information systems professional alike. The CWR Pro 452 RM automatically detects the format of the master CD and the four recorders write at a blazing 52x speed to allow for high volume duplication. This popular rackmount duplicator comes complete with a hard drive and track extraction capability and a remote module with 2-line display gives you access to added features! The hard drive will allow for up to 10 separate images to be stored. Other features of the CWR Pro 452 RM include a recording simulation mode to ensure your master can be copied safely. A simple, two-button interface allows the recording speed to be adjusted to slower speeds for use with media not certified for high-speed duplication. Taiyo Yuden media is suggested for high-speed 52x duplication.

Specifications

CD Recorder Drive: 52x Record Speed
 Power Source: 115V/230V 50-60HZ
 switchable power supply
 Weight: 42 Pounds
 Dimensions: 19"W x 18"D x 7"H
 Power Supply: 250 Watt

Operating Environment

- Temperature: 40°C (104°F) / 5°C (41°F)
- Humidity: 20%-80%

Taiyo Yuden is the recommended media for this product.

Advanced Features:
