

# Gemini CD/DVD

The Gemini is a simple to operate, mid-level throughput duplicator that does not require a PC. Single Button operation and twin high-speed drives make the Gemini an easy way to copy quickly and painlessly.

## Easy to Operate

The master disc and blanks are inserted in the Gemini's 100 disc input hopper. When the start button is pressed, the master is read first by the recorders. A disc image is created on the Gemini's hard drive, and burned to the subsequent blanks in the recorder. Finished discs are dropped into the caddy below.

## Batch Mode Processing

If Gemini finds another master disc in the input, it will overwrite the hard drive image and start recording the new data to the following blank discs.

## CD-R or DVD-R and CD-R Combo Versions Available

The Gemini is available with high-speed CD-R recorders or with dual DVD-R/CD-R recorders.

## Warranty

The Gemini comes with a 1-year Limited Warranty. Contact your Microboards Account Manager for Details!

### Physical Specifications:

Dimensions: 16"X8"X24"

Weight: 27lbs.

Capacity: 100 Disc Input / 100 Disc Output

Recorders: 2 High-Speed Industrial Recorders

-either two 52X CD or two 8X DVD 32XCD

### Technical Specifications:

Power Supply: 100-240 VAC 50/61 Hz
