

Large Diameter Speaker Unit

High power input (3000mW) for monitoring a high level of sound, and a hermetically sealed body with high sound-insulating ability.

Folding Housing With Universal Joints

Joints allow you to fold the headphones for space-saving and to turn them in each direction for free style single ear sound monitoring.

Soft Touch Housing

Designed with DJs in mind, the housing can rest against the shoulders for stability and comfort.

Stereo / Mono Selector

The selector allows you to mix right and left channel signals for single ear monitoring.

Cord Assembly (available as service part)
