

MultiWriter DVD

Microboards MultiWriter Series takes multi-disc CD and DVD recording to the next level. The MultiWriter Series is a professional system that allows for CD/DVD premastering and duplication in one easy step or as separate powerful processes. With configurations of up to 8 (16x) DVD recorders the MultiWriter Series can handle applications from the small office/software developer up to the most demanding duplication environment. This is done through the combination of Microboards, cutting-edge Firewire (IEEE 1394) and CD/DVD recording technology. Installation is made easy with a Plug-n-Play hardware interface and intuitive software setup.

With the MultiWriter, users can produce up to 8 discs in the time it would normally take to create one using conventional means. Instead of waiting a half hour for each DVD disc to be recorded, the user can record 8 at once, saving 3.5 hours per 8 DVD discs! The MultiWriter also features the ability to record up to 3 separate images to different recorders in the system. Simply start one job on a few drives, then another job on a few more drives and another to the remaining drives.

The MultiWriter DVD is compatible with DVD-R/RW and DVD+R/RW

Content protection makes it impossible to copy encrypted entertainment titles on general purpose media. Check out our DVD FAQ for more information.

ADVANCED FEATURES :

- 2 to 8 (16x) DVD Recorders
- Firewire (IEEE 1394) interface for easy installation
