500+	\$0.06	\$0.30	\$0.45

\*Thermal Re-Transfer - S&M Music Inc. uses the Rimage AutoEverest CD/DVD printer. This process allows CD & DVD discs to be printed at the quality of silk screened printing, yet at the affordability of a small print job. The pigmented ink is UV protected, ensuring vibrant colors throughout the life of a disc. The ink is not water based; there are no issues with the label smearing. Since the image is scratch proof, it enables disc to now be used for commercial distribution because Everest printed discs can withstand the rigors of day-to-day consumer handling.
